Ray Morrison

continued from page 35

Morrison coached at Vanderbilt and Temple and was 64 when he was offered the coaching post at Yale. He declined and came back to Texas, coaching well into his 70s at Austin College, a small, scholarly school in Sherman, a Yale on a small scale.

When he retired, he moved back to Dallas. He lived near SMU and watched football practice almost daily until he died in October, 1982. He loved practice, his sharp, mathematics-gearred mind feeding on the repetition and the attack of numerical strengths and weaknesses.

"After all," says George Koontz, a player and close friend until Morrison's death, "he loved math and taught it for years."

A retired attorney, Koontz was one of those wide ends for Morrison at SMU. Morrison made such an impact with his aerial magic that Koontz later joined the Air Force.

All coaches, the good and the failed, the

Matty Bell, then at TCU and Morrison's successor in 1935, tried to explain: "If Morrison's teams couldn't score, they weren't going to let your team score. He was that tough a coach."

The measurement of Morrison's career goes beyond debits and credits in the won-loss column. The bottom line, according to Koontz, shows that Morrison turned kids into responsible adults. He never met a kid he couldn't coach, or wouldn't.

"He always had a uniform," Koontz said. "No one was turned away. And every player was a member of the team. He never let us forget the team concept and he always coached that way. He never coached just the defense or the offense, but always the team."

The son of a minister, Morrison was headed for a pulpit until he discovered he was a shy orator. He decided to capitalize on his talents as a football player. He applied at SMU, then on the outskirts of Dallas. He was hired at \$200 a month and also had to teach math.

There was one other condition.

"He had to build the football field," says Koontz. "When he arrived, the president showed him a cotton field and told him to turn it into the football field."

Morrison borrowed a plow and a team of horses and went to work. The field turned out well and eventually became a 30,000-seat stadium. His first team turned out 2-5. His second team turned out worse, 0-8, and Morrison was fired.

Five years later, Morrison was back and put the Southwest Conference and SMU on the map. He took the Mustangs to the East, where the press looked upon them as a wild-west exhibit. He took them to the West Coast, where the press looked upon them as a delightful new invention.

"No one had ever seen teams throwing from their own end zone," says Koontz. "If a team threw any time but third and seven it was radical. Other teams threw in desperation, but Morrison's teams threw with a purpose. We threw on first down, second down, fourth down and from anywhere on the field."

SMU went to Notre Dame a 33-point underdog in 1930 to face Knute Rockne's last team, and one of his best. On their first two plays, the Mustangs threw passes, the second one for a touchdown. The game rocked along evenly until the last five minutes when Notre Dame wired together a drive and scored the winning touchdown—on a pass.

"One unforgettable facet of Morrison was that he never let a bad play or a close loss bother him or the team," says Koontz. "It hurt to lose that game at Notre Dame, but we got over it. That was the mathematician in Morrison. He knew there

would always be another problem ahead to solve."

Ahead was a trip to Annapolis to play Navy. Another problem, another solution.

"He devised a unique plan," Koontz remembers. "He had the two ends run down the sidelines. The two halfbacks were deep in the middle. Then we threw a little pass over the middle to the fullback. He caught the first one we tried and ran for a touchdown. It was completely unexpected by Navy—but that was Morrison. You had to expect the unexpected from him. We won that game 20-7."

Morrison was sending four and five men downfield on pass patterns in the era of the single wing and Notre Dame box. Thus he not only had to have a quarterback who could look around for open receivers, but a line to provide the time to search.

"Morrison had the ability to teach a quarterback to see the entire field," says Koontz, "but another secret was his great lines. He liked to take high school fullbacks and make guards and tackles out of them. That meant they were agile and could pull and lead interference."

Also in the Morrison repertoire was the Statue of Liberty play, which he had first used in a moment of desperation as a Vanderbilt quarterback trapped on his own goal in 1915, and the mousetrap play, called simply the Trap in modern playbooks.

"We also had a play where the right guard pulled and led the fullback through a hole at left end," Koontz recalled. "Only, we had a terrible time learning it right because the fullback kept running into the guard. So, Morrison had the fullback take the snap and ground the ball, as if he had fumbled it. By the time he picked it up the guard was out of the way and leading interference. That became known around the country as the 'SMU Fumble Play'."

All of these teachings and innovations were transmitted quietly by a coach who talked on the field as if he were in a library.

"It was conversational," Koontz says. "He simply talked to us and we talked to him. We had an open invitation to make suggestions. He never cursed or raised his voice and he seldom used a whistle—a student manager always walked around behind him carrying it."

"In this way he taught us to have confidence in ourselves and our teammates. He taught us to expect to win, but to always play as sportsmen."

Morrison's men won and they lost and then they went on to the next problem.

On the way, Koontz will always remember, "we played hard, we played 60 minutes and we had fun. Coach Morrison made it fun."

Ray Morrison enjoyed watching SMU's football practice after retiring from coaching.

lucky and the unlucky, are remembered mostly by their numbers. If numbers are the criteria, Morrison will be remembered as a success, especially in the SWC.

Three of his SMU teams were undefeated and won conference championships. An oddity Morrison could never explain, by addition, subtraction or algebra, was the 1929 season in which the Mustangs played four ties, two of them scoreless. They won six and lost none.

Nov. 12	Sterling	Ottawa	1:30

Elmer Roth begins his fourth year as the OU Athletic Director. Roth, a graduate of the OU Class of 1952, went on to earn a Masters Degree in Botany from Kansas University in 1954. He then returned to OU in the fall of 1954 to teach Biology. In 1968, Roth was elected Faculty Athletic Representative and held the position until taking over as Athletic Director. He was appointed Chairman of the NAIA District 10 Eligibility Committee in 1970 and moved up to the national level in 1971.

Peg Sigurdson joins the staff this year as Secretary while Dr. George Chaney remains as the Faculty Representative. Carlos Martinez begins his last year as Equipment Supervisor.

The NAIA Football Championship

DIVISIONS AND AREAS

Unlike basketball, where NAIA institutions compete in districts, NAIA football-playing members are classified according to Divisions — I or II. When the NAIA divided into divisions in 1970 member institutions at the time were given an opportunity to declare in which division they wished to compete. The NAIA Football Coaches Association Review Board has had the authority to rule on changes within divisions and an institution is required to spend at least two seasons in a given division once it is placed there. Within each division member institutions are arranged according to geographic areas. There are four such areas in each division.

RATERS AND RATINGS

Teams selected for participation in the playoffs are determined by weekly ratings of teams during a specified rating period through a season. Selected members of the NAIA Football Coaches Association submit a weekly rating of teams during this period which determines the participants in the postseason playoffs. Each division (I and II) is allocated 16 raters — four raters for each geographical area.

SELECTION OF TEAMS

- Institutions must declare their intent to participate in the NAIA championship program by September 15.

- Teams must be ranked in the top 12 in the final regular-season weekly rating in each division to be considered for the playoffs.

- The top-ranked team from each of the four geographical areas (in each division) within the top 12 in the final regular-season rating is automatically selected for the playoffs.

- The next four highest-ranked teams, regardless of geographic area, and not already selected, complete the eight-team field.

- No more than two teams from the same conference (within the same division) may be selected for the playoffs.

- Teams may be paired according to geographic proximity to each other for the first round (quarterfinals) and members of the same conference would play each other no later than the second round (semifinals).

- Teams with four or more non-winning games may not be selected for participation in the playoffs.

1983 PLAYOFF DATES

Division I

Quarterfinals: December 3

Semifinals: December 10

Championship: December 17

Division II

Quarterfinals: November 19

Media Coverage

MEDIA COVERAGE

Sports fans can follow the Braves in many different ways. You can keep up with the Braves in the Ottawa Herald as Rick Peterson and Terry Ostmeyer report the action. Wiley Angell will cover the action for the Ottawa Times, while staff writers will assist him by covering the beat for The Campus, the university newspaper. The Braves have also made their mark in major area newspapers such as the Kansas City Star/Times, the Topeka Capital Journal and the Wichita Eagle/Beacon. Last year's move to the KCAC increased the Braves' state-wide coverage.

KTJO - 88 FM, the campus radio station, will broadcast all Braves home and away games with Sports Director Greg Webb calling the play-by-play. You can also catch up on the scores listening to Glen Duderstadt's sports reports on KOFO - 1220 AM and KKKX, 96X FM.

SPORTS INFORMATION

The Ottawa University Office of Sports Information is located in the Administration Building, room 101. Sports information is part of the University's Development Office and is under the direction of Communications and Sports Information Director Jim Dodgen. Wiley Angell, Sports Publications Editor, is assisting in the duties. Greg Thyr is head of the statistical crew which includes Mark Passiatore, Tim Weber, and Steve Lee.

Coaches

HEAD COACH NYLE SALMANS

Nyle Salmans begins his fifth year as the head coach of Ottawa University football.

Salmans earned his Bachelor of Arts degree in physical education in 1970 from Emporia State College and went on to receive his Masters degree in guidance and counseling from Ft. Hays State in 1977.

Salmans held assistant coaching positions at McPherson College and Ft. Scott Community College before he was selected to succeed John Salavantis at OU in 1979.

COACH SALMANS' OUTLOOK FOR 1983

Head Coach Nyle Salmans sees the defense as his main area of improvement in this year's team over last year's, which finished the season with a record of 4-6. Salmans hopes to make this improvement by bringing in thirteen JUCO transfers on defense to fill the gap. Salmans replied, "By getting JUCO players we will get our experience level up." OU's defensive line has gained considerable size, by recruiting players which add as much as 100 pounds at some positions. Salmans said, "Our defense is going to be exciting to watch, simply because of personnel." In 1982 the Braves changed from a 5-2 to a 4-3 defense. This caused a problem because of the short preparation time to adapt to the new style. This year the Braves know the defense well and have added some experienced players to their roster. The Braves defensive goal is to hold its opponents to less than ten points per game. Overall OU football fans can look for an exciting defense in '83.

Finishing second in the KCAC in total offense in 1982, suggests that the Braves could be an offensive powerhouse this year. Coach Salmans wants his team to be one of the top rushing teams in the nation. Perhaps OU's head coach is expecting a lot from his newly formed backfield with considerably more size than last year. Salmans also hopes to have some improvement at the quarterback position. Salmans replied, "Our quarterback will have to be more of a factor in the game this year. He needs to be at the top of the scouting reports each week." The Braves quarterback will need to have a lot of speed to complement the veer type offense. Salmans' goal is to get more mileage out of his quarterback, running and passing. OU has added much size to their offensive line in the off season, which hopefully will give their backfield some running room.

Coach Salmans seems very happy with his recruiting season, which brought in new players in record numbers as well as 18 JUCO transfers. Salmans said, "We are counting on our JUCO players to be a major factor on our team, either by winning a position or by forcing our current players to work harder." The newly formed Franklin County Scholarship aided Salmans in his local recruiting. Salmans said he had always tried to get local players, but this year he had something more to offer them.

Some of the local recruits will give the Braves immediate help, while others will help in building the program.

The move last year from the Heart of America Conference to the KCAC gave OU much more exposure statewide, therefore it helped OU in recruiting Kansas athletes. This year over fifty percent of OU's football roster is from Kansas. After one year in the KCAC Salmans spoke about the league, "I was surprised that there were that many good teams." Salmans added, "In the KCAC you have a tough game each week."

Salmans and his coaching staff have decided to go to a more strict practice schedule in '83, practicing "hard" three times per week. They think that the best way to build a team is to get in as many repetitions each week as possible. Perhaps this new system will build the aggressive team that they are looking for.

When asked about his goals for this year, Salmans replied, "We are here to win!"

Front Row: Nyle Salmans, Bob Cole. Back row: Brad O'Dea, Jim Grogan, Mark Hammel. Mike Christie, not pictured.

ASSISTANT COACHES

Jim Grogan, a member of the OU Class of 1953, begins his tenth year on the coaching staff. Grogan, who coaches receivers and tight ends, was the defensive back coach for seven years and has also coached in the Ottawa public school system. While attending OU he was a four-year letterman. His wife Doris and son Scott are also OU alumni.

Beginning his second year at OU, Bob Cole is coaching the linebackers as well as taking on the responsibility of defensive coordinator. Cole graduated with the OU Class of 1965 where he majored in Physical Education. He went on to receive his Masters degree from Emporia State University in 1973. Cole begins his 18th year in coaching, 16 of which were at the high school level prior to his return to OU last year. He is also the head men's basketball coach.

Mike Christie begins his second year on the OU coaching staff as defensive secondary coach. Christie, a native Kansan, played strong and free safety at Shawnee Mission South High School, Independence JUCO and Kent State University, Kent, Ohio. His goal is to have the most aggressive defensive secondary in the KCAC.

Brad O'Dea is rejoining the coaching staff this year after coaching previously under Dick Peters and Ben Moor. He also coached for three years in the Ottawa public school system and one year at Emporia State University. O'Dea, an OU graduate, is coaching the defensive line.

Mark Hammel joins the coaching staff this year to coach the offensive line. The Fairfield, Ohio, native played defensive end and linebacker at Kent State University. In his first year of coaching he will stress that the offensive line come off the line quick and strong.

Information Courtesy of Bethany College

BETHANY COLLEGE

Bethany is a four-year liberal arts college, dedicated to providing a quality program of Christian Higher Education in a distinctive cultural and regional setting. Its educational mission is to create learning experiences which will assist students in becoming socially responsible and integrated individuals who are capable of fruitful engagement in the world in which they live.

On October 15, 1881, the institution which is now known as Bethany College held its first class in the Bethany Lutheran Church in Lindsborg, Kansas. Starting as an academy, the school had its charter amended in 1886 and it became a college with the right to confer baccalaureate degrees. The four-year college program was introduced in 1887 and the first class was graduated in 1891. There are now over 900 students on campus.

President: Dr. Arvin Hahn
Football Head Coach: Dr. Ted Kessinger
Athletic Director: George Stephens
Facility Rep.: Dr. Joyce Pigge
Stadium: Philip Anderson Stadium
Nickname: Swedes
Location: Lindsborg, KS
Director of P.R.: A. John Pearson
Student Sports Info.: Rod Cole
Colors: Blue and Gold

Franklin's High Rate Line-up Safe, Strong and Flexible

Check Liquidity and Money Market Rates

Insured Market Rate Account

- Pays a higher rate than most money funds.
- Make as many withdrawals as you want.
- Earn current money market rates on entire balance.

A Safe High Yield at the Term You Want

Insured Growth Certificate

- Select a maturity from 2½ to 10 years.
- No minimum deposit for maturities from 30-84 months.
- Earn a higher rate with a 84-120 month maturity and a \$2000 minimum.

Tax Deferred Savings with Guaranteed Completion

The Franklin IRA

- Select a maturity from 1½ to 10 years.
- No minimum required for the lower rate—a \$2000 minimum earns a higher rate.
- Deduct contributions on your 1983 taxes.

*"Writing the book on innovative
financial services."*

No fees or service charges on any Franklin Account—Each account insured to \$100,000 by the FSLIC. Call for current rates.

Home Office: 700 S. Main, Ottawa 242-2804 Branches in Kansas City, Mission, Overland Park, Olathe, Spring Hill, Lyndon, Baldwin and Iola.

Who gives you investment ideas from the same source money managers look to the most?

Who else but Merrill Lynch.

People who know a business really well, soon learn who they can rely on for advice and information. In the investment business, it's the research team at Merrill Lynch.

For four years running, the Merrill Lynch research team has ranked first—by substantial margins—in the annual *Institutional Investor* poll of investment professionals.

But how does that help you if you're not investing millions at a time?

The key is your personal Merrill Lynch Account Executive. Our Account Executives have almost instant access to the full resources of Merrill Lynch research through a remarkable nationwide communications system. Current research opinions on some 1400 stocks are as close as their computer terminals.

And our Account Executives can call on specialists in such fields as tax investments and corporate and municipal bonds to amplify their own knowledge of any particular type of investment that might be appropriate for you. No other financial services firm gives its Account Executives such strong and diversified backup support.

And that's one reason no one else can give you more help with more kinds of investments. No one else.

Merrill Lynch

Merrill Lynch, Pierce, Fenner & Smith Inc.

A breed apart.

**GUESS WHO HIRED
MORE PEOPLE RIGHT OUT
OF COLLEGE LAST YEAR
THAN ANYONE ELSE.**

Hiring college grads is something the Army has always done. And lately, we've been doing a lot more of it.

In fact, last year alone nearly 7,000 college grads chose to begin their future as Army officers.

Why? Some wanted the opportunity to develop valuable leadership and management skills early in their career.

Others were impressed with the amount of responsibility we give our officers starting out. And still more liked the idea of serving their country around the world.

Interested? Then you can start preparing for the job right now, with Army ROTC.

ROTC is a college program that trains you to become an Army officer. By helping you develop your leadership and management ability.

Enrolling can benefit your immediate future, too. Through scholarships and other financial aid.

So the next time you're thinking about job possibilities, think about the one more recent college graduates chose last year than any other.

For more information, contact the Army ROTC Professor of Military Science on your campus. Or write: Army ROTC, Dept. FB, P.O. Box 9000, Clifton, N.J. 07015.

**ARMY ROTC.
BE ALL YOU CAN BE.**

THE LEGENDARY BO McMILLIN

by Larry Vaught,
Danville Advocate-Messenger

College athletics have faced trying times in recent years and have been under intense scrutiny from both the media and sports fans. Many unpleasant incidents have made headlines in newspapers across the nation all too frequently.

That's why the life of Alvin Nugent "Bo" McMillin still stands out as a tribute to the good that can come out of college athletics.

McMillin and his teammates on the Centre College football team shocked the nation when they upset Harvard, a gridiron powerhouse that had not lost a game for five years, 6-0 on October 29, 1921. It was an astonishing victory for the school from Danville, Ky., which had fewer than 200 students, and stunned the sports establishment from coast to coast.

The elusive McMillin, who found his way to central Kentucky from Ft. Worth,

Texas, engineered the victory that many still consider to be the greatest college football upset of all times. He scored the game's only touchdown on a dazzling 32-yard run and changed the country's outlook about eastern football superiority.

"That was the first time big eastern schools ever paid any attention to teams from any place else in the country," says A.B. "Happy" Chandler, former governor of Kentucky and ex-commissioner of major league baseball. "Before then, the eastern schools were disdainful of anybody else. They didn't think they could be beaten. Bo McMillin changed that."

Centre, known as the "Praying Colonels" because of its pregame prayers, compiled a 38-4 mark during McMillin's career and no one disputes that the talented quarterback was the leader of the extraordinary group.

McMillin led Centre College to an amazing victory over Harvard in 1921.
