

Professor Utt has been invited to
give an address before the Music

Teachers' National Association which meets during the holidays at Philadelphia to form a National Association of Conservatories and Schools of Music. Kansas is the only state which at present has such an association, so naturally the musicians of the Sunflower state have gained a widespread reputation in this as well as in other respects. Prof Utt, as President of the state organization, will be able to give valuable aid in the forming of the larger national association.

Professor Utt goes to Topeka each Wednesday, where he teaches in the Muller School of Music.
