

This is a picture of Prof. Martha Stoltz (in case you might wonder.) She is the gal who helped coach get away with 205 gallons of school alcohol. She used the above disguise in order to keep coustomers from recognizing her.

MYSTERY OF HOW SWEDE PAYS BILLS AT LAST REVEALED

MARTHA FIRST SUSPECTED OF
FOOTING THE BILLS

HOODWINK THE SCHOOL

Investigation Shows 205 Gallons of
Alcohol Unaccounted
For

One of the biggest mysteries on the campus has just recently been cleared up by a member of the Campus staff. For a long time the students have been wondering where Coach Errickson got money enough to keep his Pontiac polished up and running all of the time, and enough to take Prof. Martha Stoltz on several dates each week, including trips to hockey games, shows, etc. in Kansas City.

It has also been a mystery how a poor college football coach, who gets half of his salary some months and none other months, could continue to take his meals in the most expensive coffee shops in town. Of course there is that wheat farm, but who is making money on a wheat farm in these times?

At first we suspected that Martha was footing the bills. She lives at home and doesn't have to spend much except for those gaudy dresses that she buys, and so why shouldn't she help if she could get someone who was hard up enough to have to go with her?

Careful investigation, however, has proved that our theory was entirely wrong.

As most of you know, there has been a lot of drinking going on in school this year. This together with the fact that Martha, who teaches zoology, has access to the school's supply of alcohol, set us to thinking. As most of you know, the school buys government alcohol in 60-gallon barrels for use in the chemistry and biology laboratories. It is kept locked up in the vault in the Campus store, and is taken to the various laboratory storerooms in gallon quantities. Usually the school uses one of these barrels per year. We find that this year they are on their fourth barrel already. Of course even dumb freshmen like Carl Dunlavy and Rex Weaver can see that something is wrong here.

To make a short story long, just this has happened: The practice of drinking spiked beer became much in vogue on the O. U. campus this fall. At first supplies of alcohol were purchased at Garnett in five-gallon quantities and sold by the pint or quart by members of a certain boarding club, whose name we won't mention (the house is painted green).

Dee and Martha, seeing how much money they might make and also realizing how much better it would be for the athletes to drink government alcohol than bootleg stuff, decided to start up a business of their own.

We checked up with Leland Rogers, very virtuous storeroom keeper (you know he is going with one of those lady preachers now), and he says that the biology department has used only ten gallons of alcohol this year. About five gallons has been used by the chemistry department. Subtracting twenty gallons (five for evaporation) from the 225 which have been used we still have 205 gallons to account for.

After rummaging around in Swede's desk for some time we came across the following notations on a slip of paper which will help solve the problem:

Clarence Daylight—3 gallons, \$12.00.

M. M. M.— $\frac{1}{2}$ pint (for cleaning shoes) .50.

Bird Club (By Delbert Wagg, pres.) 6 gal. \$24.00.

"Duck Dinner" at Sam Hubbard's 1 gal. (We didn't charge for this)

Dr. Rowe—(for christening party) 2 gal, \$8.00.

Jack Knapper—2 gal. \$8.00 (Charged).

Carrol Thornburg—8 gal. (for fla-

voring meat) \$8.00

Allan Pett—1 gal \$4 00 (Note—Remember to throw in an alarm clock with the next order so that when he is sleeping off the effects of the day before he can wake up in time to get to basketball games.)

Dr Fogdall--2 gal \$8 00 (To spike punch for ministerial party)

John Roehl and Pete Parker—3 gal \$12 00 (Remember to give them the best so they will give all their business to us instead of going to Greeley so much

Thus we could go on and on giving examples of how these criminals have hoodwinked the school. Altogether it is estimated that they have taken in \$800.32 from their illicit practices
