*The course taken by Miss Brown is of equal grade with the Classical Preparations...

Courses of Study.

The aim of the institution is liberal culture, thorough and symmetrical. This end is to be attained by a protracted course of disciplinary training.

As indicating the lines along which students are advised and encouraged to work, courses of study are arranged for the Collegiate Department, and work has been done with the studies of the Freshman year. But advanced courses are valuable only for such as have the requisite preparation. Experience proves that the habits of the scholar are formed and his success made possible in the early part of his educational career.

During the current year the chief demand has been for academic work, and to this most of the labor of instructors has been given. For the years 1883-4 a regular Freshman class of the classical course will be formed, and the wants of persons desiring to pursue more advanced studies will be satisfactorily met.

I. THE COLLEGIATE COURSES extend through four years each, and the completion of one; or the other, in a proper manner entitles to the appropriate degree—for the classical, Bachelor of Arts; for the scientific, Bachelor of Science.

II. THE PREPARATORY COURSES take pupils having a fair knowledge of common English branches, and by their three years training fit them for entering upon collegiate work.

They also afford good facilities to such as desire to review English branches with reference to greater proficiency in teaching. In every science studied, a genuine mastery of principles and their relations is required.

The regular courses cover all that is valuable in a normal course; those of the Preparatory Department including all the

requisites for the five-years State certificate for teachers; while to those desiring more advanced normal training, the Collegiate courses include all that is required for a State diploma. The essentials of a business course are amply met in the Eclectic.

III. THE ECLECTIC COURSE, offering opportunity for special preparation along particular lines, is designed to meet the demand of such as, for whatever reason, contemplate earlier entrance upon practical life, and yet desire to possess the advantages of liberal learning that may be derived from pursuing a portion of the broader course. It comprises such branches as students shall, under the advice of the Faculty, elect. Its students recite in existing classes of a regular course, using the same text-books. Special pains are taken to give the students in this department the instruction that they require.

Selections so made will cover all that is given in any normal course of other colleges of the State.

To such as have taken the Eclectic course, a certificate of proficiency in studies pursued will be granted.

Recitations and Examinations.

After religious exercises with which the public exercises of each day are opened at 8:40 A. M., recitations are held from 9 A. M. to 1 P. M. Each class has three daily exercises, and more is not encouraged.

Absence without accepted excuse forfeits standing, and careless absence oft repeated will not be tolerated.

Stated reviews and examinations are conducted by means of both written and oral exercises, under supervision of the Faculty.

Advancement with the class is conditioned upon performance of the work assigned, as evinced in the regular daily tests and in general exercises by a mark of 75 on a scale of 100.

3D TERM.	Latin—Sallust. Greek—Homer. Civil Government.	Latin—Sallust Natural Science—Geology. Botany. Book-keeping. Civil Government.

Accessory Advantages.

LOCATION.

Ottawa is easily accessible by railroad from all quarters. Its physical surroundings are pleasant and healthful. Its moral atmosphere is exceptionally good, and its enviable reputation as being the leading temperance city of the State is well deserved.

LIBRARIES.

The City Library of 4,000 volumes is an occasional valuable adjunct to the University library of smaller size, but containing a choice selection of standard works of reference.

LITERARY SOCIETIES.

Two well organized and efficient Societies, holding weekly meetings, give frequent exercise in the arts of prompt, elegant and effective expression.

RELIGIOUS SOCIETY.

A branch of the Y. M. C. A., organized within the institution, holds weekly meetings for devotional exercises and for study of the Bible and of best methods of doing Christian work.

Religious weeklies, through favor of the publishers and of other friends, are continually upon the tables. Quarterlies, magazines and secular weeklies are also regular visitants.

RHETORICAL EXERCISES.

Every student has instruction and practice for one hour each week in elocution and whatever pertains to English expression. Twice each term each student in the Preparatory Department presents a declamation, and twice each term an essay; while each student in the Senior Preparatory class once each term presents an original oration. These exercises before the assembled students in chapel have proven a very gratifying feature of the work of the year.

Church.

While attendance at church is not compulsory, students are urged to form the habit, and record kept shows that they respond as generally as where definite law on the subject is announced.

Discipline.

The authority for government is vested in the Faculty, and the conduct of students at all times is subject to their supervision.

The University is not a reformatory institution. Its members are supposed to come for work. The administration recognizes a wise self-control as the best fruit of discipline, and aims to prepare for freedom and fidelity in all the relations of life.

Expenses.

Boarding, with lights, fuel and furnished room, can be obtained in private families at from \$3.00 to \$4.00 per week.

Boarding in clubs has averaged, for the current year, about \$1.80 per week.

Tuition in all departments, including incidental expenses, is \$12 for first term, \$9 for second term, \$9 for third term, or \$25 in advance for one annual scholarship, not transferable.

Rules established by the Trustees require that settlement of all bills be made at the beginning of each term.

No deduction is made for absence unless by reason of protracted illness.

Worthy young men preparing for the ministry, who may need it, being approved by churches and by the Board of Christian and Ministerial Education of the Kansas Baptist Convention, receive aid through that Board.
