

Mr. V.

Mr. Justo Diaz stated that

his resignation came about because of a feeling of restlessness and an urge to explore different things. He has served at O.U. for seventeen years in such varied positions as professor of physics, program director, planning officer, and acting dean. Mr. Diaz has no job offers yet but is looking into a variety of ideas such as working with a corporation or starting a new business. Since Ottawa is not exactly full of new opportunities, his goals may be directed toward a new area. Although warm weather would be nice, Mr. Diaz said the type of work that he will be doing is more important than geographical considerations.

Mr. Diaz has obviously been a very dedicated member of O.U.'s faculty, and said that he will continue to

keep his ties with the university and support it with money and involvement. His resignation will be effective on July 31.
