Professional Minister"]

While only some of these--not the whole load!--would be appropriate, at various times, in a particular integration seminar, I thought it might be of some use, at least to me, to lay it all out as of this date. The primary use of these thinksheets is for occasional-supplemental reading, not for use in the sessions. A very few of them are forms/exercises requiring writing; and some of these are to be submitted (a) to me, a few of which will be used (b) by the group [e.g., in case conferences]. [I have not assessed, as to their "integration" worth, thinksheets done before I began teaching integration seminars at NYTS. | #23B is the single exception.]
