

succeed. We use the Graham and Gregg systems, and Smith Premier and Remington typewriters. The time to complete the prescribed course depends very largely upon the diligence of the student. Our graduating speed is one hundred and twenty-five words per minute in shorthand and forty words per minute on the typewriter. Students may enter at any time and advance as rapidly as they can. No waiting for slow pupils.

Especial attention is given to teaching the principles of shorthand and also business correspondence, manifold, abstracting, court and newspaper reporting, etc., so that the student who completes our course need not fear to undertake any of the many positions that are open for the stenographer.

I. **Corresponding Style.** Gregg's Manual, or Graham's Handbook. Phonetics, Principles, and Word-building; Exercises. Reading: First and Second Phonographic Readers, and U. C. S. Series.

II. **Reporting Style.** Principles of Abbreviation; Phrasing; Logograms; Exercises. Reading: "The Greatest Thing in the World," and other selections in Reporting Style.

III. **Typewriting.** Special attention is given to the "Touch System" of Typewriting; Mechanism and Machines; Principles; Fingering; Correcting Errors; Copying; Manifold. Students are expected to operate either the Smith Premier or the Remington machine with speed and accuracy before graduation.

TELEGRAPHY COURSE.

The training given in this course, in the initiatory, intermediate, and finishing departments, is systematic, thorough, and complete, embracing everything essential to a practical knowledge of telegraphy and station agent's work. The following is an outline of the course:

Battery, its care and management; relation of circuits and instruments; line of main circuit; putting up

lines; adjustment of instruments; standard train orders; train signals; classification of trains; train dispatches; rules governing the movement of trains by telegraph orders; classifying, billing, and proper reporting of freight.

No person will be graduated from this course until he can receive thirty words per minute accurately, spell well, write a legible, rapid hand and pass a satisfactory examination in the other branches required in the course. Nine months is the length of time given to complete all branches mentioned in this course, but students may do this work in less time and will be permitted to graduate on giving evidence of the requirements mentioned above by passing successfully the examinations in the various studies.

Learning the art of telegraphy is not difficult or tedious. There is no duty of the telegrapher which any person of ordinary ability may not readily learn to perform if he but give the proper study and attention to the subject.

SUMMER SCHOOL.

Owing to the demand for work of this nature, the Business Department of the University holds each summer a session of eleven weeks, for which the regular tuition and incidental fee, amounting to \$10, is charged.

The Summer School is no experiment, as it has been conducted for the past five years with remarkable success. It opens on the Tuesday following Commencement Week.
