PLANNING CHART	PERSON	local SECULAR	larger COMMUNITY	LOCAL ECUMENE	denom. LARGER CHURCH	concil. OUR LOCAL CHURCH
current action?						
intervention- type of current action?						
community resources?						
local religious resources? I.e. I.C.						
ideal intervention?						
b.i.? b.is.?						
I.c. support?						
schedule?						

INTERPRETATION:

*This Planning Chart is a sorting instrument, a means of distributing (in the short dimension) the ministered-to and (in the local dimension) the questions a local church should ask itself as it decides its "distinctive mission" in ministry to persons and communities (including itself).*

EXPLANATIONS:

"Intervention type of current action" means Is the action between preconditions and causes (primary intervention), between causes and effects (secondary i.), or between effects and consequences (tertiary i.)?

"Local religious resources" are divided into "local ecumene" and "local church."

"B.i." means What's the best intervention with the resources available?

"B.is." means Who's the best intervener (or who are the best interveners) in the light of available resources?

"L.c. support" means What local-church support can we count on?

"Schedule" means a calendar of termini (target dates for the various stages of the planned action).

NOTE: Not all planning will require the full use of such a full Planning Chart; but in its planning a local church should, somehow, *systematically* raise all these questions.
